

## ABSTRACT OF THE DISCLOSURE

There is disclosed a data presentation apparatus including: a data laying table on which data such as a  
5 written/drawn draft and solid material are to be laid; an  
aspheric reflection mirror, disposed above the vicinity of  
a side part of the data laying table, for obliquely taking  
an image light of the data laid on the data laying table and  
reflecting the image light of the data; an image forming  
10 optical system which cooperates with the aspheric reflection  
mirror to form the image light of the data reflected by the  
aspheric reflection mirror into an image; and an image pickup  
element for receiving the image light of the data formed into  
the image by the image forming optical system.
